POLICIES GOVERNING NON-ATHLETIC CONTESTS

The following policies governing Non-Athletic Contests and the Suggested Standards for Controlling Non-Athletic Activities are included in the Federation Handbook as a courtesy to the Non-Athletic Committee of the National Federation. The Non-Athletic Committee adopted these Policies and Standards to serve as guides to State Associations for patterning codes at the state level.

SUGGESTED STANDARDS FOR NON-ATHLETIC ACTIVITIES

1. All interscholastic activities involving more than two schools and sponsored by member schools or agencies outside the schools and advertised as high school events or contests, or those in which only high school students participate, shall have the approval of the state association's executive board.
2. In all interscholastic activities the principal or superintendent shall be the official representative of the school. He shall be responsible for the observance of all rules and regulations governing the activities in which his school participates.
3. Contests approved by the national contest, festival and tournament committee of the National Association of Secondary-School Principals, shall be automatically approved, provided such contests conform with the policies of the state association.
4. Contests and events requiring out-of-state travel shall not be approved if the round-trip distance is more than 600 miles. Exceptions: National events such as F. F. A. conventions and those approved by the contest committee of the National Association of Secondary-School Principals.
5. Contests or events sponsored by a community which involves only one school shall not require approval.
6. Requests for approval of all school sponsored contests and events shall be made by the superintendent or principal of the host school.
7. All contests and events shall be approved on a year-to-year basis.
8. All-state groups (such as bands, choruses, orchestras, debate squads, etc.), if permitted, shall have the approval of the executive board.
9. The awarding of cash prizes shall be discouraged, but the acceptance of pay for playing in dance bands, teaching, singing, etc., shall not cause a student to lose his eligibility to compete in interscholastic activities.
10. It is recommended that contests sponsored by outside agencies shall not be approved if students or schools are required to pay an entry fee or purchase materials in order to participate.
11. National contests requiring team or group participation shall not be approved. Interstate contests requiring team or group participation are not recommended for approval if such contests are held for the purpose of selecting a regional champion.

MUSIC

1. Each school shall be limited to a maximum of two county, league or

NOTE: Due to a more sophisticated information gathering system, the figures noted on the 1979 National Federation Sports Participation Survey are generally lower than surveys of the last four years. The main factors resulting in this decrease include the listing of United States schools only and the listing of senior high school participation only. Previous survey figures included some Canadian high school participation and some U.S. junior high school participation.

It can be safely assumed though, that any increase in a particular sport is a real increase. Unfortunately, the percentage of increase cannot be reliably measured.

In short, no true comparisons can be made to any previous survey with regard to growth and/or decline of a particular sport or overall participation.

1980 SPORTS PARTICIPATION SURVEY

Compiled By
THE NATIONAL FEDERATION OF STATE HIGH SCHOOL ASSOCIATIONS
Based on Competition at the Interscholastic Level in 1979-80 School Year

NOTE: Due to a more sophisticated information gathering system, figures beginning with the 1979 National Federation Sports Participation Survey are generally lower than surveys of the previous four years. The main factors resulting in this decrease include the listing of United States schools only and the listing of senior high school participation only. Previous survey figures included some Canadian high school participation and some U.S. junior high school participation. No true comparisons can be made between the 1980 survey and surveys prior to 1979.

NOTE: Due to a more sophisticated information gathering system, figures beginning with the 1979 National Federation Sports Participation Survey are generally lower than surveys of the previous four years. The main factors resulting in this decrease include the listing of United States schools only and the listing of senior high school participation only. Previous survey figures included some Canadian high school participation and some U.S. junior high school participation. No true comparisons can be made between the 1979 survey and surveys subsequent thereto.

NOTE: Due to a more sophisticated information gathering system, figures beginning with the 1979 National Federation Sports Participation Survey are generally lower than surveys of the previous four years. The main factors resulting in this decrease include the listing of United States schools only and the listing of senior high school participation only. Previous survey figures included some Canadian high school participation and some U.S. junior high school participation. No true comparisons can be made between the 1979 survey and surveys prior thereto.

NOTE: Due to a more sophisticated information gathering system, figures beginning with the 1979 National Federation Sports Participation Survey are generally lower than surveys of the previous four years. The main factors resulting in this decrease include the listing of United States schools only and the listing of senior high school participation only. Previous survey figures included some Canadian high school participation and some U.S. junior high school participation. No true comparisons can be made between the 1979 survey and surveys prior thereto.

NOTE: Due to a more sophisticated information gathering system, figures beginning with the 1979 National Federation Sports Participation Survey are generally lower than surveys of the previous four years. The main factors resulting in this decrease include the listing of United States schools only and the listing of senior high school participation only. Previous survey figures included some Canadian high school participation and some U.S. junior high school participation. No true comparisons can be made between the 1979 survey and surveys prior thereto.

NOTE: Due to a more sophisticated information gathering system, figures beginning with the 1979 National Federation Sports Participation Survey are generally lower than surveys of the previous four years. The main factors resulting in this decrease include the listing of United States schools only and the listing of senior high school participation only. Previous survey figures included some Canadian high school participation and some U.S. junior high school participation. No true comparisons can be made between the 1979 survey and surveys prior thereto.
